FLORIDA SKIN CENTER TO OPEN NEW LOCATION

Florida Skin Center is scheduled to open a fourth location on May 7 at 329 East Olympia Ave. in Punta Gorda. The two-story, 7,000-square-foot building features a Mohs surgical center with six specially-designed Mohs suites. Each surgical guest suite includes a gourmet coffee and tea bar, juice, water and other beverages, plus hot snack items from a microwave oven. Patients will also enjoy music and a high-definition television in their suite where they will remain for the entire visit, as well as have unprecedented access to service with same-week Mohs surgery and general dermatology appointments. The interior of the building is meant to resemble a five-star spa with tile floors, marble and granite countertops, as well as wood cabinetry and other accents found in Florida Skin Center's three other Southwest Florida locations. Guest amenities will range from spacious lounge areas and examination rooms to high-definition televisions and Wi-Fi in the lounge and examination rooms, plus a warm-towel greeting, as well as a coffee, tea and juice bar and diffused air throughout the facility.
